

PERMANENT STUCCO WASH,
WITHOUT SIZE OR OTHER CORRUPTIBLE
INGREDIENT

JOHN & CO., St. George's, having been appointed by the Government as the manufacturers of this very useful material, to the notice of the Trade and the Public generally, we offer every advantage over the common white Wash or Water Colours, and are enabled to supply in all quantities at short notice. It is perfectly dry and united to any other—DOES NOT DISCOLOR, and may be kept twenty-four hours, and being a non-corrosive substance, is well adapted for Railway Stations, Union Workhouses, Hospitals, Schools, Prisons, etc. One cut will cover six square yards. It will wash off with water, and MAY BE REPEATED WITH PERFECT SAFETY.

JOHN & CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its usefulness for internal as well as external work, has become much more popular than ever before. It has no base so elastic qualities; may be painted or papered over in any colour, never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of this PAINT are well known for its application to the walls of all kinds of buildings, and generally, it supports the testimonials, prescriptions, and every information made available on application to the Sole Agents, **PHILIP HARE and Co.** at the Warehouse No. 40, Abchurch Lane, Upper Thames-street. A Liberal Allowance will be made to the Trade.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sherry Stone, but is much better adapted to engineering works from the rapidity with which it sets and hardens under water. It has been long used in the great Barges at Chertsey, in a similar manner at Aldershot; and at Dover New Pier, to unite the masonry. The foundation of the centre pier of the Tular Bridge at Menai Straits is laid in Medina Cement. A new groynes at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and sand. It is the best material for the construction of piers exposed to the most violent gales of the Channel, in a position where former constructions had been repeatedly washed away. The inconspicuousness of the varied qualities of Roman Cement are superseded by those of this improved manufacture.

CHAS. FRANKS & CO., the Kings, London & of Wigan.
Medina Mill, Newport, Isle of Wight.
Agent for Southampton, E. L. FLUDER, American Wharf.

PARIAN CEMENT for internal use, to be
PAINTED IN A FEW HOURS AND PAPERED
WITHIN A COUPLE OF DAYS—CHARLES FRANCIS and
SONS, Patenters, Nine Elms, London.

GRAVES'S BLUE LIAS LIME.—The superior manner in which the above is ground renders it cheaper for concrete or stonework than any other lime or cement. The blue lime is made from the best quality of the Blue Lias quarried at the Blue Lias Works, near Exeter, Devon, England. The material is constantly exposed to the action of the weather, and is therefore of the best quality. It is used by the best architects and Constructors of the above, in the best recommendations. It is sold by the following firms:—
Gibbs, Osmond, and Co's Blue Vitified Bricks, 11, Upper St. Martin's Lane, London, W.C.

ROMAN PORTLAND, PABIAN, ANTON, and LIA
CEMENTS of the best quality.
OSMOND, PABIAN, PROCTOR, and other Bricks

PORTLAND CEMENT. — CHARLES
RICHARDSON has the greatest abundance in Liverpool
to the top of the above superior CEMENT, being of uniform colour
and of the best quality. It is sold in bags of 40 and 50 lbs.
Unmixed, it possesses extraordinary cementing qualities,
resists the action of frost and heat, and is more durable than any
other. It is also used for the purpose of growing, and is
used for the purpose of growing, and is used for the purpose of growing,
with which its contents rapidly produce a strong film of more or less
first quality of the day for work upon all the above materials and
requiring. It is manufactured on the only principle, Portland
cement, and is sold in bags of 40 and 50 lbs. It is sold in bags of 40
who have hitherto had the necessary. Manufactured by R.
GERVAISE, at his Works, near the River Avon, and sent to
all parts of the Kingdom per boat or rail, at a reduced price to the
